Professional Experience

Red Leaf Software, Remote
Full Stack Developer

10/2021 – 11/2023

- Managed multiple projects and conducted biweekly client meetings to discuss progress and upcoming web application updates.
- Assessed and examined bug reports, resolved issues, and applied necessary bug resolutions.
- Created and maintained a revenue management web application utilizing Angular 2, TypeScript, and Firebase with cloud functions.
- Designed and built the front-end of a new bartering website using SvelteKit and TypeScript.
- Developed and integrated new system components based on specific client requirements.
- Adapted existing system components to meet client needs by following coding best practices and protocols.

GT7Leagues.com(Personal Project)
Full-Stack Developer

12/2023 – Current

- Developed and launched GT7Leagues.com, a platform for Gran Turismo 7 enthusiasts to create and join racing leagues.
- Implemented a user-friendly interface that allows users to easily create a league and post events on a front-facing calendar.
- Integrated Supabase for backend services, enabling secure and scalable user data management.
- Worked with SvelteKit to ensure a seamless and responsive user experience across all devices.
- Collaborated with the Gran Turismo community to gather feedback and continuously improve the platform's features and usability.

Volunteer Experience

Tim Cools Project (Therapist Directory), Remote
Frontend Developer

03/2021 – 10/2021

- Led the execution of the team's design goals, ensuring a seamless and pleasant user experience.
- Leveraged ReactJS library and Material-UI to develop projects.
- Hosted the project utilizing AWS EC2.
- Achieved a 25% increase in new users while simultaneously managing an active user base of over 3000 individuals and ensuring continuous growth.
- Assisted in the migration from WordPress to React technology while maintaining utilization of the WordPress API as a headless Content Management System (CMS).
